Why Did We do This?

As of right now, Farmingdale does not offer a mobile application for Oasis, which makes it harder for students to keep track of their records on the go.

Some students may not have access to laptops or computers and sometimes searching oasis on a mobile browser can be quite laggy.

Having a mobile application for this could be quite beneficial for students because they can have access to features such as registering for classes, viewing their schedules, and reviewing their financial aid information, from the comfort of their mobile devices.
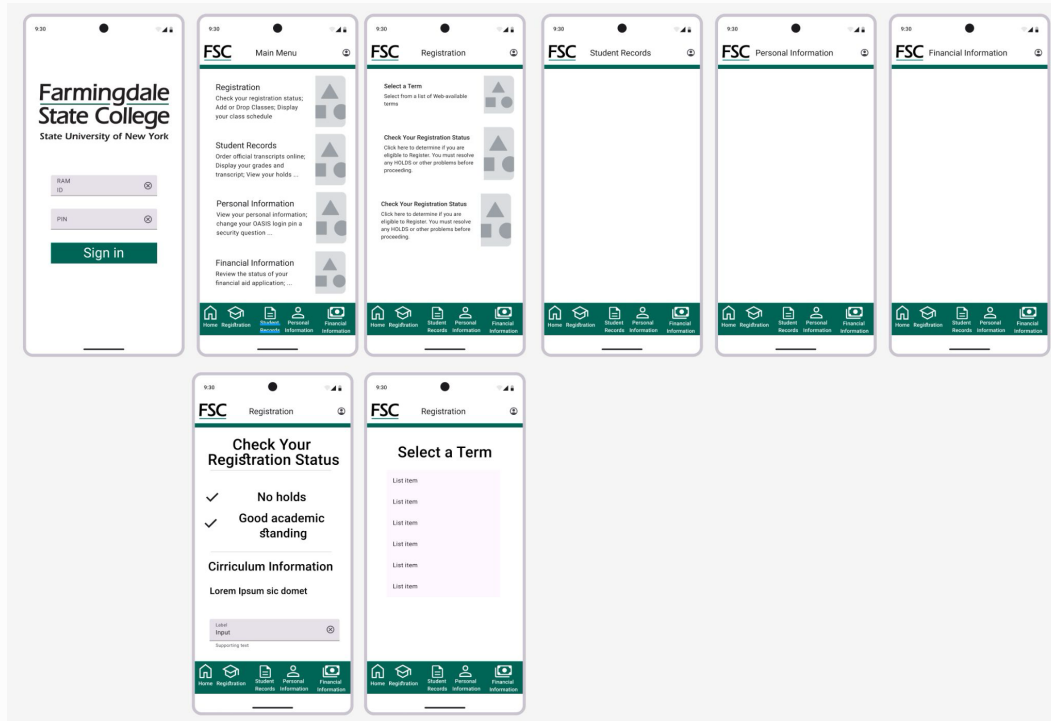

Overview

- Developed a dynamic main menu screen for a student portal app using Jetpack Compose in Kotlin.
- Features a personalized welcome message and a user-friendly interface for navigation.

Key Features

- **User Personalization**: Displays a welcome message with the user's first and last name and their last login time.
- **Graduation Section**: Highlights important graduation-related resources for students graduating in Fall 2024 and Winter 2025, with clickable links.
- **Main Menu Sections**: Includes six key categories:
    - Registration
    - Bill Payment
    - Student Records
    - Personal Information
    - Financial Aid
    - Parking Decals & Violations
- **Dynamic Navigation**: Utilizes `NavController` for seamless navigation to different app sections.
- **External Links**: Opens external web pages like the Student Payment Portal using `Intent`.
